Division Breakouts  
Briefing and Accountability.

Two additional camps have been added to the Soberanos Incident.

1. Carmel Camp – 4860 Carmel Valley Hwy.
2. Pfeiffer Camp- Pfeiffer Campground off HWY 1

On Sunday July 31, 2016 fire crews will be going to all three camps for the first time, to insure all crews receive a briefing, Division Supervisors will meet and brief their crews at the locations listed below. Division supervisors will ensure accountability and give a thorough briefing.

Branch I

Division A – DP 1  
Division B – DP 5  
Division C – DP 10  
Division F – DP 20

Branch II

Division G – DP 30  
Division H – San Clemente  
Division I – DP 35  
Division J – DP 36

Branch III will have briefing and accountability at Pfeiffer Camp

Branch IV

Division Z – DP 90  
Division X – DP 70  
Division T – DP 50  
Division S – TBA

Carmel Branch will have briefing and accountability at Carmel Camp.

Contingency Branch

Contingency 1 – DP 5  
Contingency 2 – Andrew Molera State Park  
Contingency 3 – Carmel Valley Rd. and Tassajara Rd.  
Road Group 1 – DP-5  
Road Group 2 – Andrew Molera State Park c/o Hwy 1

Staging will have briefing and accountability at Ord Staging.

All Division Supervisors will report through Communications that they have full accountability of assigned resources and the resources have been briefed.

## Soberanes Fire Weather Forecast

**FORECAST NO:** 8

**NAME OF FIRE:** Soberanes

**PREDICTION FOR:** 0700 Sun-0700 Mon

**UNIT:** CA-BEU/LPF

**SHIFT DATE:** 7/31-8/1

**SIGNED:**

**TIME AND DATE**

**FORECAST ISSUED:** 1900 7/30/16

**Incident Meteorologist- Ryan Walbrun**  
**NWS-Bay Area**

**WEATHER DISCUSSION:** The marine layer is about 2000 feet along the immediate coast and 1500 feet up Carmel Valley and ridges along Branch I and II. Overall weather changes today will be minor but the trend will be a few degrees of cooling and higher humidity, especially for areas below 2000 feet. Interior portions of the fire will remain warm to hot with dry humidity readings. The general wind flow remains from the southwest which will continue to push smoke towards Carmel Valley and the higher population areas. The fire camps and ICP will see fog in the morning hours with drizzle and cool seabreeze winds during the afternoon. Night operations should continue to expect very dry air above the 2000 to 2500 foot layer. Another new RAWS has been installed along Blue Rock Ridge to support firing operations and monitor night time humidity. Looking ahead the forecast calls for a return to just seasonable weather with NO hot or breezy weather forecast. The marine layer will persist along the coast and valleys with dry/warm air above.

### **WEATHER FORECAST FOR Sunday:**

**WEATHER:** Fog along Hwy 1. Otherwise smoky, warm and dry except more sunshine Branch III.

**TEMPERATURES:** Cooler. 78 smoky areas to 90 full sunshine. 63-72 along Hwy 1 in Branch IV.

**HUMIDITY:** Afternoon minimums 15-25% above 2000 feet inland Divisions. 50-65% Div T/X/Z.

#### **20 FT WINDS:**

**RIDGETOP -** Southerly 4-8 mph afternoon gusts 10-12 mph except locally stronger along Highway 1 and Div T with south winds gusting 15-20 mph.

**SLOPE/VALLEY -** Becoming upcanyon 2-5 mph afternoon gusts 10-12 mph.

**Marine Layer:** 2000 Feet at the coast and 1500 ridges of Carmel Valley.

### **WEATHER FORECAST FOR Sunday Night:**

**WEATHER:** Areas of smoke otherwise clear. Mild and dry with low humidity hills except fog on the coast.

**TEMPERATURES:** 64-74 above 2000 feet. 51-58 along Hwy 1 in Div T/X/Z and up Carmel Valley.

**HUMIDITY:** Poor recovery 20-30% above 2000 feet.  
Good recovery 70-90% lower slopes Div T/X/Z along the coast.

#### **20 FT WINDS:**

**RIDGETOP -** Southerly 3-6 mph.

**SLOPE/VALLEY -** Evening upcanyons 2-5 mph...becoming downcanyon 2-4 mph overnight.

**Marine Layer:** Around 2000 feet.

**SAFETY INFORMATION:** Know your elevation in relation to the marine layer. Take weather observations!

**Portable RAWS** 163.350 Tone 0031 for Bottchers Gap, Tone 0032 DP1, Tone 0034 Pinyon Peak, Tone 0035 White Rock, Tone 0029 for Blue Rock, Tone 0038 Chew Ridge.

# FIRE BEHAVIOR FORECAST

FORECAST NUMBER 7	TYPE OF FIRE Surface
FIRE NAME Soberanes	OPERATIONAL PERIOD 7-31-2016 24 HOUR SHIFT
DATE ISSUED 7-30-2016	TIME ISSUED 1900 HOURS
UNIT CALFIRE BEU	SIGNED  Jon Heggie FBAN

## INPUTS

**WEATHER SUMMARY** *A slight cool down will have little impact on fire behavior.  
PLEASE REVIEW INCIDENT METEOROLOGIST FORECAST*

## OUTPUTS

### FIRE BEHAVIOR

#### GENERAL

Fire activity in the South that received clear air and received solar radiation had marked increases in fire behavior. Critical rates of spread and spotting were observed where heavy fuel loading aligned with slope under clear skies. Smokey conditions on the east side of the fire shaded fuels and fire activity was moderate with rollout and slope reversal runs. **ERC will be at historic highs for this operational period** and situational awareness must be used the whole shift. Indirect line construction or smokey conditions may make it difficult to see the main fire and **reaction time to escape routes** must be planned accordingly. The fire is burning in a mix of brush, grass and timber understory; fuels will vary by slope and aspect. The southeast side of the incident has moved into the Basin burn scar and has had little effect on fire spread. Depth of the marine layer had helped increase RH but active fire has been observed with 85%RH. Look for RH to drop after midnight and activity to increase until 0500. Steep canyons with backing fire will have the potential for rollout and slope reversal resulting in dangerous rates of spread upslope. Probability of Ignition = 60% under the smoke and 90% in the sun. Spotting Distance= 1/4 mile  
Fine Dead Fuel Moisture = 3-5% Energy Release Component in the fire area are above the 97<sup>th</sup>

#### SPECIFIC

##### BRANCH I

Divisions A, B, C, F

Division A will continue to show extremely low RH and moderate fire active should be expected. Indirect line construction must use lookouts in obstructed or smokey conditions. Rollout and slope reversal will continue to challenge direct fire control efforts. Sustained hot and dry weather over the last few days and more solar radiation may increase fire behavior in previously quiet divisions. Look for sleeper spots in drainages or canyons.

##### BRANCH II

Divisions G, H, I, J

Look for potential heavy fire activity to the South of this Branch and make a North run in drainages that lead into this branch. A week of hot and dry weather has cured fuels into prime burning conditions. If the smoke inversion lifts, solar radiation will increase fire behavior and lookouts must be used in all situations. The fire should have moderate to dangerous rates of spread where slope and drought stressed fuels align. Some sustained crown runs have been observed and but mostly rollout and slope reversal runs have challenged control efforts. Fire activity at night has been heavy with little to no RH recovery. Watch out working on indirect line and know what the fire is doing on neighboring branches at all times.

##### BRANCH III

Divisions K

Indirect line construction must use lookout to know what the fire is doing at all times. The daily progression of the fire should not impact this branch but escape routes must be identified and reevaluated as the operational period moves into prime burn windows.

##### BRANCH VIII

Divisions N, O, P

Fire activity continues to challenge this branch with observed short duration Crown runs and critical rates. Escape routes must be identified and evaluated through out the operational period. Look to the fire to continue to push to the south when it finds opportunity in deep drainages with heavy fuel loading. The RH recovery is not expected to slow the fire activity and all night operations must plan for active fire after midnight.

##### BRANCH IX

Divisions S, T, X, Z

Despite most of this division being in or under the marine layer there is still active fire burning in the canyons and drainages. A strong Southern jet has had observed winds over the branch in excess of 20mph. The steep terrain and potential rollout will have potential for moderate growth if rollout combines with the predicted South wind.

#### AIR OPERATIONS:

- Smoke or fog could make visibility difficult through out the incident
- Fire Behavior can change rapidly don't rely on air craft for your plan

#### SAFETY

- Indirect line must have lookouts that can see the main fire
- Expect fire activity after midnight due to a drop in RH, monitor weather every hour
- Dead trees could fall and cut off escape routes

## **SNAGS HAZARD TREES and ROCKS**

**PREVIOUS SHIFT PERSONNEL CONTINUE TO REPORT ISSUES WITH SNAGS**

### **Watch Out**

- Ground cover has burned loosening the stability of the root system
- Oak trees are susceptible to limb fall this time of year as they stressed
- Fire suppression, air drops and dozers can dislodge rocks, logs and boulders

### **Mitigation**

- Remove the hazard if safe to do so
- Flag and report the hazard to personnel
- Be alert while working and driving in hazard area, listen and 'yell out' to others

## **TRAFFIC**

**FIRE BORDERS TWO STATE HIGHWAYS**

### **Watch Out**

- Highway 1 remains open for weekend traffic so watch for high speed vehicles
- Roads in the fire area are narrow and steep and civilian traffic is in the area
- Watch for congestion through the weekend in the Carmel Valley area

### **Mitigation**

- Drive with a high level of Situational Awareness and optimum defensive driving techniques
- Use 'road guards' as necessary to coordinate traffic flows on road systems
- Use warning lights as appropriate when entering highways with fast moving vehicles

## **GENERAL HEALTH**

**EXHAUSTION MAY COMPROMISE SAFETY!**

### **Watch Out**

- Diet can cause chronic feelings of exhaustion
- Arduous work can consume body fluids, electrolytes at higher rates
- Steep terrain and hot dry conditions increases the risk of fatigue and exhaustion

### **Mitigation** – Proper nutrition reduces fatigue and exhaustion emergencies

- Eat foods which provide steady energy • limit sugary, fatty, fried and processed foods
- Hydrate-proper hydration prevents fatigue • Manage work rest ratio while performing work
- Be on the lookout for signs of exhaustion and lookout for one another

Note: Anyone that witnessed or has firsthand information of the dozer roll over fatality that was not interviewed by the SART please contact Chris Carrera at 951-757-5932

  
**JACK PICCININI**  
**TEAM SAFETY OFFICER**

POSITION OAK: Take quick preventative measures once exposed

Prepared By (Communications Unit)  
 John Brooks (COML) 

Incident Location  
 5 MILES SOUTH OF CARMEL, GARRAPATA STATE PARK, MONTEREY CALIFORNIA

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to [com205@fire.ca.gov](mailto:com205@fire.ca.gov) or fax to the local ECC and ask them to email it for you.

## PUBLIC INFORMATION SECTION

Incident Information Line: (831) 204-0446 or 211

Incident Media Line: (831) 647-6257

STATUS	
Incident Start Date: 07/22/2016	Incident Start Time: 8:48 am
Incident Type: Wildland	Cause:
Incident Location: Soberanes Creek, Garrapata State Park, Palo Colorado, north of Big Sur	Total Personnel:
Acreage:	Containment:

**MEDIA** – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. You can get further information about Penal Code Section 409.5(d) at <http://www.leginfo.ca.gov/cgi-bin/displaycode?section=pen&group=00001-01000&file=403-420.1>

**CAL FIRE SOCIAL MEDIA POLICY** – When on a CAL FIRE incident you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can get further information about the CAL FIRE Social Media Policy at <http://calfireweb.fire.ca.gov/library/handbooks/0600/0691.pdf>

**PHOTOGRAPHS AND VIDEOS OF INCIDENT** – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics. You can also send your photographs and videos to the following email [Soberanesfire2016@gmail.com](mailto:Soberanesfire2016@gmail.com)

**LOST AND FOUND** – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

**MAIL SERVICE** – The Information Section will assist you in getting items mailed from the incident as well as receiving items whether it is letters or packages.

# CAL FIRE

## INCIDENT MANAGEMENT TEAM

### WATER USAGE PLAN

#### *California Drought Emergency*

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

#### **Fireline personnel- (During mop up operations)**

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

#### **Road Maintenance and Repair-**

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc).
- Consider use of tertiary or treated water (sp)

#### **Aviation Operations-**

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

#### **Private Water Supplies-**

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

#### **Public/ Municipal Water Supplies-**

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

#### **Management and Supervision-**

- Use leaders intent and consider establishing Water Conservation as a Management Objective.
- Consider complexity of water use on incidents. Consider establishing a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- Review this check list and brief daily.

# CAL FIRE

## INCIDENT MANAGEMENT TEAM

### WATER USAGE LOG

DATE: \_\_\_\_\_

Division / Group: \_\_\_\_\_

AGENCY ID / VENDOR: \_\_\_\_\_

I.e., Strike Team 1110C, Acme Water Tenders

REQUEST # \_\_\_\_\_

**TURN INTO FINANCE DAILY**

WATER SOURCE LOCATION	Hydrant	Open source i.e. pond	Tank	Gallons Used	Property Owner / Contact Number if known **

**\*\*Please note if you made contact with property owner and their contact.  
(Use reverse side if needed.)**  
**Information:** \_\_\_\_\_

The intent of this document is intended to track, record and validated the amount of water used on a incident. It's not intended to review the performance of equipment using the water on an incident.

# **TRAINING SPECIALIST MESSAGE**

**A Training Specialist is available for trainees on the  
incident.**

**All federal, state and local government agency trainees  
working on position task books will need to register with  
the Incident Training Specialist in order to receive proper  
credit for your assignment.**

**Drop off boxes located @ Pfeiffer, Carmel & Toro ICP's.**

**Complete Trainee Data Form & place in Drop off box.**

**Upon Demob, Check out with the Training Specialist @  
Fort Ord.**

## **Questions**

**Dennis Martin**

**707-479-8421**

**Jonathan White**

**562-324-1811**

## DEMOB

### SOBERANES INCIDENT CA – BEU – 003422

- Resources must Check-In prior to the Demob process.
- In order to be deemed excess, supervisors must submit an ICS #213 to the Resources Unit.
- Strike Team Leaders and/or Overhead personnel report to Demob (ICP-Toro Park) at the times posted on the Tentative Demob List, which is posted around the Incident Base and through the QR Reader.

\*Engines should remain at the Camp assigned to, until STEN advises their resources to depart to vehicle inspection. If the Strike Team has supplies and/or equipment checked out, the strike team leader should return the supplies. If needed, an engine may accompany the strike team leader.

- Prior to reporting to Demob (ICP – Toro Park):  
**Please return all supplies and equipment.**
- Resources will get signatures from the following units:
  - Motels
  - Supply
  - Ground Support
  - Training (If they have a trainee)
  - Communications
  - Documentation
  - Time
  - Demob
- Vehicle Inspection will be completed at Fort Ord (Ground Support). Once inspection is completed, resource will report to the CAL FIRE or OES Time Unit and Demob at Fort Ord. After the #221 is given to Demob, the resource is approved to travel back to home unit or a reassignment.

## **FIRE SUPPRESSION REPAIR PLAN**

### **SOBERANES FIRE: CA-BEU-003422 7/31/16**

Fire Suppression Repair is the repair of damage caused directly by fire suppression activities. It is not the repair of areas damaged by the fire activity itself such as burned material and secondary damage such as falling trees or erosion from hydrophobic soils. We are responsible for repairing only the damage caused by fighting the fire. We are also not responsible for upgrading facilities beyond their pre-fire condition.

#### **Instructions for suppression repair during mop-up**

While performing mop-up operations dozer or excavator operators will install waterbreaks on all dozer lines while dozers will install waterbreaks on secondary access roads. Dozer lines amongst the structures shall have the berms pulled and waterbreaks installed where necessary with hand crews to minimize the impacts on residents. Hand crews will install waterbreaks on all handlines, and waterbreaks on dozer lines situated on extremely steep slopes may also need to be installed by hand crews.

Scattered trash shall be collected and deposited in trash piles. Trash piles will be removed and placed at drop points either before or while hose lays are collected. Police your areas and clean them up as events wind down.

#### **Inventory and Mapping**

Suppression overhead and other personnel will document repair needs and their location. This information will be given to the Fire Suppression Repair Group. **GREEN** flagging will be used to designate area in need of repair. The type of repair/instructions will be written directly on the green flagging for ease of use.

#### **Objectives**

- Install waterbreaks while crews and dozers are actively onsite on roads, trails, and handlines damaged by fire suppression.
- Waterbreaks shall have proper angle and open outlets to insure effective drainage.
- Repair damaged fences (remember, those portions damaged by suppression efforts, not by the fire itself).
- Restore barriers on roads that were previously closed but opened for suppression activities.
- Insure that drainage is provided at crossings, ditch drains, remove deposited material, and stabilize approaches.
- Report any damage or damages mitigation to the Fire Suppression Repair Group.
- Complete all repair work as determined by the Fire Suppression Repair Specialist prior to final demobilization.

#### **Firelines/Existing Fuelbreaks/Staging Areas/Safety Zones/Heliports/Drop Points**

- Remove debris deposited during suppression activities, including flagging and signs.
- Install waterbreaks where necessary for erosion control.
- Pull berms back onto disturbed areas, except in areas identified as needing a berm to serve as a barrier for roads/trails.
- Spread brush across the disturbed areas to provide ground cover and a seed source.

## **Forest Service Wilderness and State Parks Special Instructions – Resource Advisor**

### **DOZER LINES - DIVISIONS K, M, P, and CONTINGENCY LINES**

- Dozer lines will not exceed 50 feet in width except for safety reasons.
- Dozer lines in Wilderness will be repaired later; construct line to minimize impact.
- Do not push brush off steep hillsides – it will be spread over the line during repair.
- Minimize removal of top soil – it will be spread back over the line during repair.
- Avoid riparian areas, seeps and springs.
- Avoid archeological sites flagged with black/yellow and blue ribbon

### **Wilderness Minimum Impact Suppression Tactics (MIST)**

The intent of Minimum Impact Suppression Tactics is to suppress a wild fire with the least impact to the land. Fire conditions and good judgment dictate the actions taken. Consider what is minimally necessary to halt fire spread and contain it within the fireline.

#### **FIRELINE CONSTRUCTION PHASE:**

- Use cold-trail, wet line or combination when appropriate.
- Allow fire to burn to natural barriers.
- If constructed fireline is necessary, use minimum width and depth to check fire spread.
- Remove or limb only those fuels that if ignited would have potential to spread fire outside the fireline.
- Minimize cutting of trees, burned trees, and snags unless determined they will cause fire spread across the fireline or endanger workers.
- Cut brush or small trees flush to the ground; camouflage the cut surface with soil or brush.

#### **HELISPOT CONSTRUCTION:**

- Consider using a long line remote hook in lieu of constructing a helispot.
- If construction is necessary, consider natural openings, or previously used areas. Cut only what is necessary to achieve safe operating space.

## **HUMAN RESOURCE MESSAGE**

### **YOUR RIGHTS AND RESPONSIBILITIES**

#### **YOU HAVE THE RIGHT TO:**

- ❖ Work in a harassment-free environment where people treat one another with dignity, equity, courtesy, and respect.
- ❖ Say “no” to unwelcome advances or requests for favors.
- ❖ File a complaint or grievance through appropriate avenues.

#### **YOU HAVE THE RESPONSIBILITY TO:**

- ❖ Behave in a manner that treats people with dignity, equity, courtesy, and respect.
- ❖ Abide by agency and incident ethics and conduct regulations.
- ❖ Report any harassment or other inappropriate behavior you observe or experience.

HR Office is located in the Quonset Hut (tent) #15 at ICP

HR (Fire) SPECIALIST: MARY MCDONOUGH

HR (Fire) SPECIALIST Trainee: WYTOSHA CONEY

## **Archaeological and Historical Sites Fireline Guidance for the (NAME) Incident**

**Do not compromise safety for the protection and preservation of archaeological and historical sites. When feasible and prudent:**

1. Be on the lookout for prehistoric and historic sites. Prehistoric archaeological sites include boulders and bedrock with mortars and cupules, holes and grinding surfaces, temporary camps containing scatters of stone flakes, and deposits of dark brown to blackish soil with shell fragments (midden) occurring in layers or mounds on flat surfaces near sources of water, along coastal areas and wetlands, along ridges and saddles, and other areas suitable for camping. Historic sites include old wooden cabins, barns, corrals and other buildings, rock foundations and historic artifact scatters. These kinds of resources are often found in the same kinds of environmental settings as prehistoric camp sites.
2. Some archaeological and historical sites have not been flagged yet. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment.
3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.
4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
5. When a site is discovered, flag it for visibility and report its location to the Division Supervisor. If feasible, note locations of discovered resources on a map. Better yet, take a GPS reading. Leave information with the Plans Section so that the sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.
6. If you encounter a burial or other human remains, cease work in that area immediately and contact the CAL FIRE Archaeologist. State law requires that CAL FIRE then contact the County Coroner, who will then determine if the remains are part of a crime scene. If the Coroner determines that the remains are Native American, State law requires the Coroner to contact the Native American Heritage Commission in Sacramento.

## **Wilderness Special Instructions – Resource Advisor**

### **DOZER LINES - DIVISIONS K, M, & P**

- Dozer lines will not exceed 50 feet in width except for safety reasons.
- Dozer lines in Wilderness will be repaired later; construct line to minimize impact.
- Do not push brush off steep hillsides – it will be spread over the line during repair.
- Minimize removal of top soil – it will be spread back over the line during repair.
- Avoid riparian areas, seeps and springs.

### **Wilderness Minimum Impact Suppression Tactics (MIST)**

The intent of Minimum Impact Suppression Tactics is to suppress a wild fire with the least impact to the land. Fire conditions and good judgment dictate the actions taken. Consider what is minimally necessary to halt fire spread and contain it within the fireline.

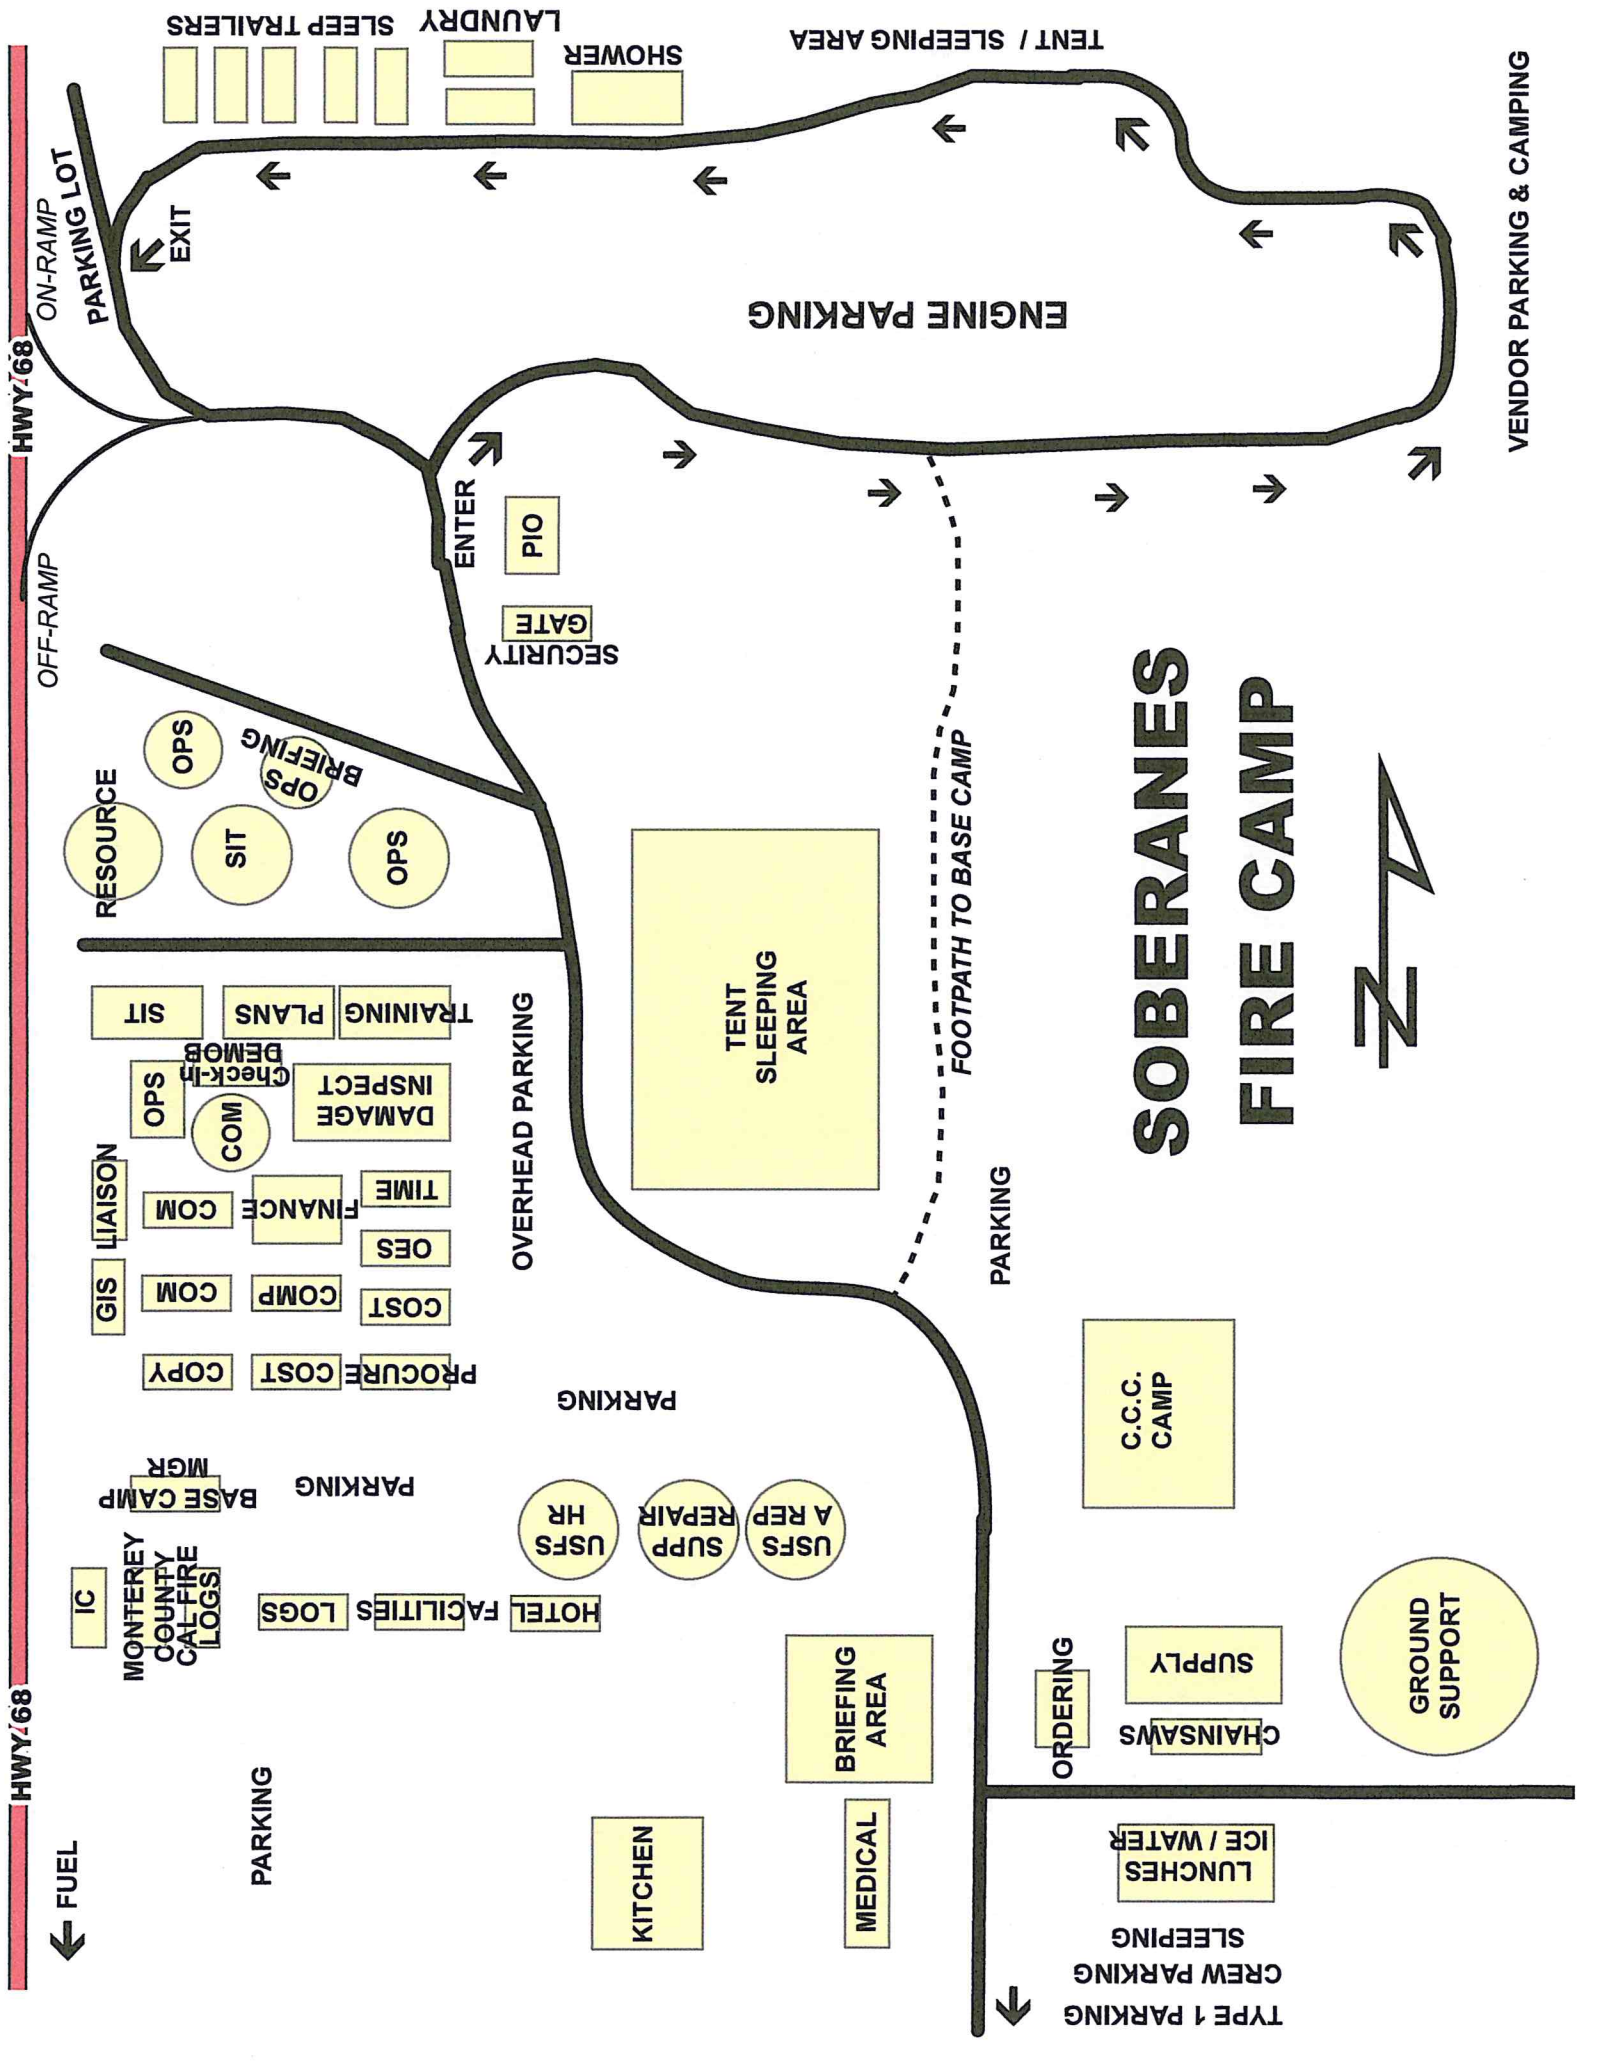

#### **FIRELINE CONSTRUCTION PHASE:**

- Use cold-trail, wet line or combination when appropriate.
- Allow fire to burn to natural barriers.
- If constructed fireline is necessary, use minimum width and depth to check fire spread.
- Remove or limb only those fuels that if ignited would have potential to spread fire outside the fireline.
- Minimize cutting of trees, burned trees, and snags unless determined they will cause fire spread across the fireline or endanger workers.
- Cut brush or small trees flush to the ground; camouflage the cut surface with soil or brush.

#### **HELISPOT CONSTRUCTION:**

- Consider using a long line remote hook in lieu of constructing a helispot.
- If construction is necessary, consider natural openings, or previously used areas. Cut only what is necessary to achieve safe operating space.

# FIRING OPERATION CHECKLIST

Location: \_\_\_\_\_

Date: \_\_\_\_\_ Time: \_\_\_\_\_

Firing Supervisor \_\_\_\_\_

## 1. Personnel Briefing

- ☐ Objectives
- ☐ Conditions (fire environment)
- ☐ Resource assignments identified
  - ☐ Firing personnel
  - ☐ Holding forces
  - ☐ Lookouts
- ☐ Ignition plan/sequence
- ☐ Communication Plan
- ☐ Contingency Plan
- ☐ Safety issues

## 2. Go / No-Go

- ☐ All personnel briefed
- ☐ Weather forecast reviewed
- ☐ Resources in place
- ☐ Lookouts posted as needed
- ☐ Anchor and termination firing points identified
- ☐ Communications systems in place
- ☐ Fire behavior forecast reviewed
- ☐ Escape routes and safety zones established and made known
- ☐ Adjoining forces/Air Attack notified

## 3. Approval Prior To Firing

- ☐ Division Supervisor
- ☐ Branch Director
- ☐ Operations

## 4. Other Notifications

- ☐ Other: \_\_\_\_\_
- ☐ Other: \_\_\_\_\_

Attach Firing Operations Checklist to ICS-214
